About Me

Software Engineer currently proficient in JavaScript, Typescript and Ruby on Rails ecosystems and I'm eager to expand my skill set. Having strong skill set in business development and sales at start-ups, I am passionate about improving and utilizing a range of technologies to develop features that impact users. I get enjoyment out of being immersed in a web-apps development, troubleshooting and working on the little things that have a huge impact.

Technical Skills

Langauges

- JavaScript, TypeScript, Ruby, SQL.

Back-End

- Ruby on Rails, Node.js, Sqlite3, Active Record, Sinatra, PostgreSQL

Front-End

- React, React Router, DOM, HTML, CSS, Semantic UI, Tailwind CSS, DaisyUI.

Tools & Platforms

- Git & GitHub, Balsamiq Wireframes, Postman, Canvas, Photoshop, Figma, Dbdiagram.io, Google Analytics, Excel.

Current Learning & Interests

- React Native, MUI.
- Python, Django

Technical Projects

StreetChariot | [Github](#)

Web transportation application that allows less technically savvy users to learn about and access public/private transportation web-apps.

- Developed, troubleshot and debugged full-stack application with JavaScript/React/Node.js front-end and Rails/Active Record/PostgreSQL back-end.
- Created custom controller/model methods, routes and seeds to allow proper front and backend routing.
- Engineered session-based authentication in order for data to persist between HTTP requests and authorization features.
- Executed a UI and UX design strategy using CSS, Tailwind CSS, and DaisyUI.
- Conceptualized and designed a wireframe, then translated it into functional features.

Loop | [Github](#)

Event planning application, users can share events, see who is attending and add a plus one.

- Coded and debugged client-side routes using React Router.
- Built backend API with complete CRUD action capabilities including authentication/authorization with password protection.
- Installed Bcrypt gem to securely store sensitive information on the database and RSpec to create unit tests for Rails models.
- Created user interface with ReactJS, blended responsive web design using Semantic UI React and CSS.

OnlyHogs | [Github](#)

Users are able to view and post cute pictures of pigs, and also comment and engage with all app posts.

- Developed a Front-end project using Javascript, React and CSS with full CRUD functionality.
- Implemented a web API with Sinatra and Active Record to support React frontend.
- Designed and created app's layout from scratch with CSS.
